

Visual schedule starter kit

A visual schedule shows your child what comes next, one picture at a time. Use the templates on the next page with photos, drawings or printed pictures.

- 1** **Pick one routine**
Start with a routine that is hard right now, such as getting out the door, bedtime or bath time.
- 2** **Break it into steps**
List three to six steps in order. Keep each step small and concrete: “shoes,” not “get ready.”
- 3** **Add pictures**
Draw, glue or tape a picture in each box. Photos of your child's real things work well.
- 4** **Use it every time**
Point to each step as you go. When a step is done, cover it or move it to a “done” spot.
- 5** **Ask your BCBA**
Your child's team may already use a visual system. Use the same pictures and words so home and therapy match.
